

Pumpout Boat Program

The Department of Environmental Services would like to thank all the boaters who used the pumpout boat in its initial year, 2002. Approximately 140 boats were serviced with over 3000 gallons of sewage removed. We look forward to continuing this program and hope that more boaters will help to make this program a success.

If you have any comments about this program, please direct them to NHDES at (603) 271-0698. Thank you!

Portsmouth Harbor Towing

Hours of Operation: Please call for an appointment.

Contact: Steve Root or Kenny Anderson at (603) 436-0915.

Fee: \$10 per pumpout, cash or check (payable to State of New Hampshire).

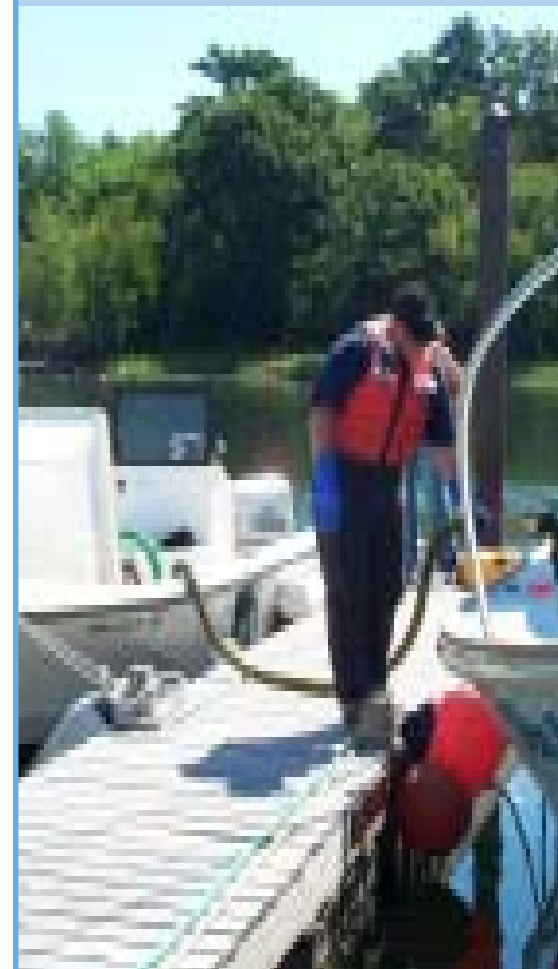

This information was developed by the BOAT/U.S. Clean Water Trust, with support from U.S. Fish and Wildlife Service, Federal Aid in Sport Fish Restoration, and the New Hampshire Department of Environmental Services.

NHDES's Coastal Pumpout Program

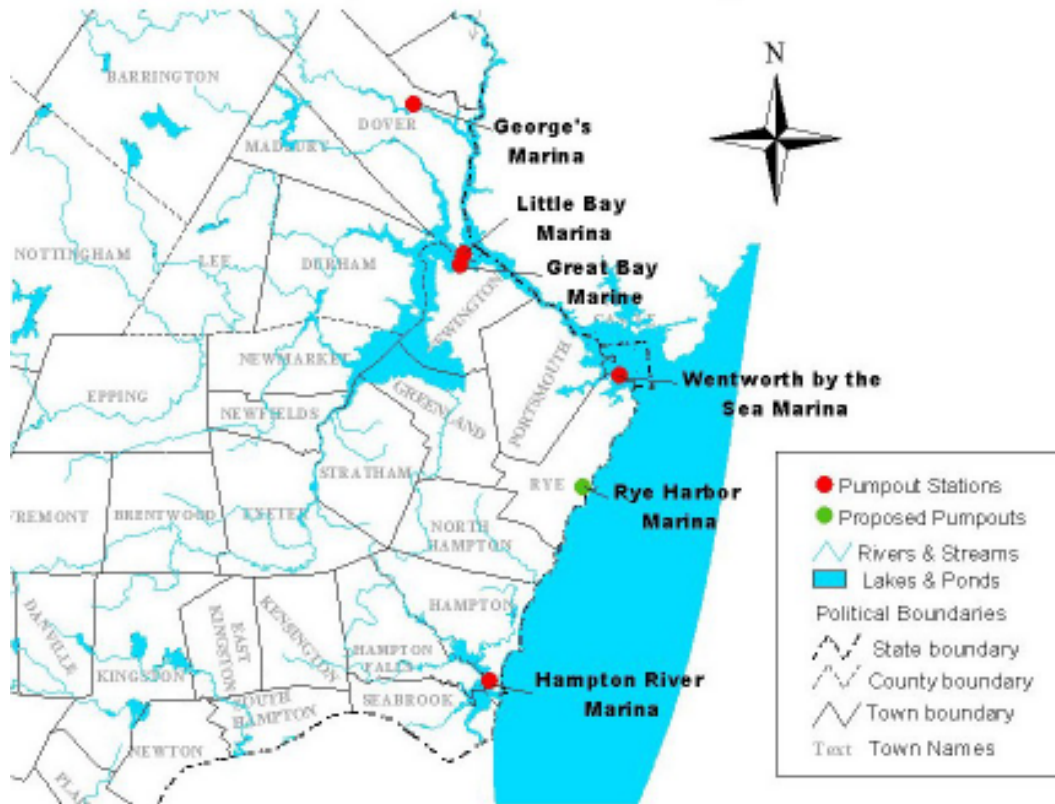

**Protecting our coastal waters
by providing the boating
public with convenient waste
removal services.**

Why is it important to use pumpout facilities?

- ✓ Pumpout facilities are integral tools to keep our coastal waters clean. Pathogenic bacteria, viruses, and nutrients are found in human wastes and, if dumped into our coastal waters, can affect human health and water quality.
- ✓ These pathogens can transport diseases to humans such as hepatitis, typhoid, and cholera. If people consume raw shellfish that has been contaminated with any of these diseases they may become ill.
- ✓ Nutrients contained in waste, like phosphorus and nitrogen, provide food for plants and algae to grow to nuisance levels, reducing the aesthetics of the waterbody.
- ✓ Since boats generally congregate in shallow, closed-in areas - including harbors and marinas - that are slow to flush, nutrients and bacteria may become concentrated in the water. Using pumpout facilities decreases the supply of nutrients to the water and reduces pathogens that may cause waterborne diseases.

New Hampshire Coastal Pumpout Stations

Dockside Pumpout Facilities

George's Marina

Location: 33 Cocheco St., Dover
Lat/Long: 43°11.891"N, 70°52.072"W
